API Spec Q1 9th Edition Practical Implementation Training and Certification

Course Overview

The 4 days 'API Q1 Practical Implementation' course is specially designed with a Learning Objective to provide fundamental knowledge and working understanding of QMS requirements of API Spec Q1 9th Edition for Manufacturing Organizations for the Petroleum and Natural Gas Industry.

The course comprises of following

- 3 Days API Q1 Fundamentals

- 1 Day Practical Activities for Implementation of Key Elements of Q1

You will be given all-inclusive knowledge of the API Spec Q1 standard requirements, with an intent to provide interpretation of all the clauses in the most simplified manner the way API is looking for. establishing, documenting, and implementing the effective QMS. In addition to this, participants will be exposed to practical activities Risk Assessment, Contingency Planning, Management of Change (MOC), and Quality Plans.

The program will be delivered using practical examples and hands-on group activities. Our course facilitators will ensure that after completion of the training workshop, participants will be able to establish, document and implement the most effective API Q1 Quality Management System in their organizations.

Training program primarily covers Q1 sections: (4) Quality Management System Requirements; (5) Product Realization; and (6) Quality Management System Monitoring, Measurement, Analysis and Improvement. Particular key areas of study include the following.

- Management responsibility
- Quality Objectives
- Control of Documents
- Competency requirements
- Risk Assessment and Management
- Design & Development
- Critical Suppliers
